

SecPass — Instant OTP Mastery

Your secure gateway to corporate platforms.
Get your login codes instantly — no SMS required.

Bypass the wait.

SecPass is a dedicated authenticator app on your phone.
When you log in to your portal, the code appears
directly in the app within 5 seconds.
Zero reliance on mobile network signals.

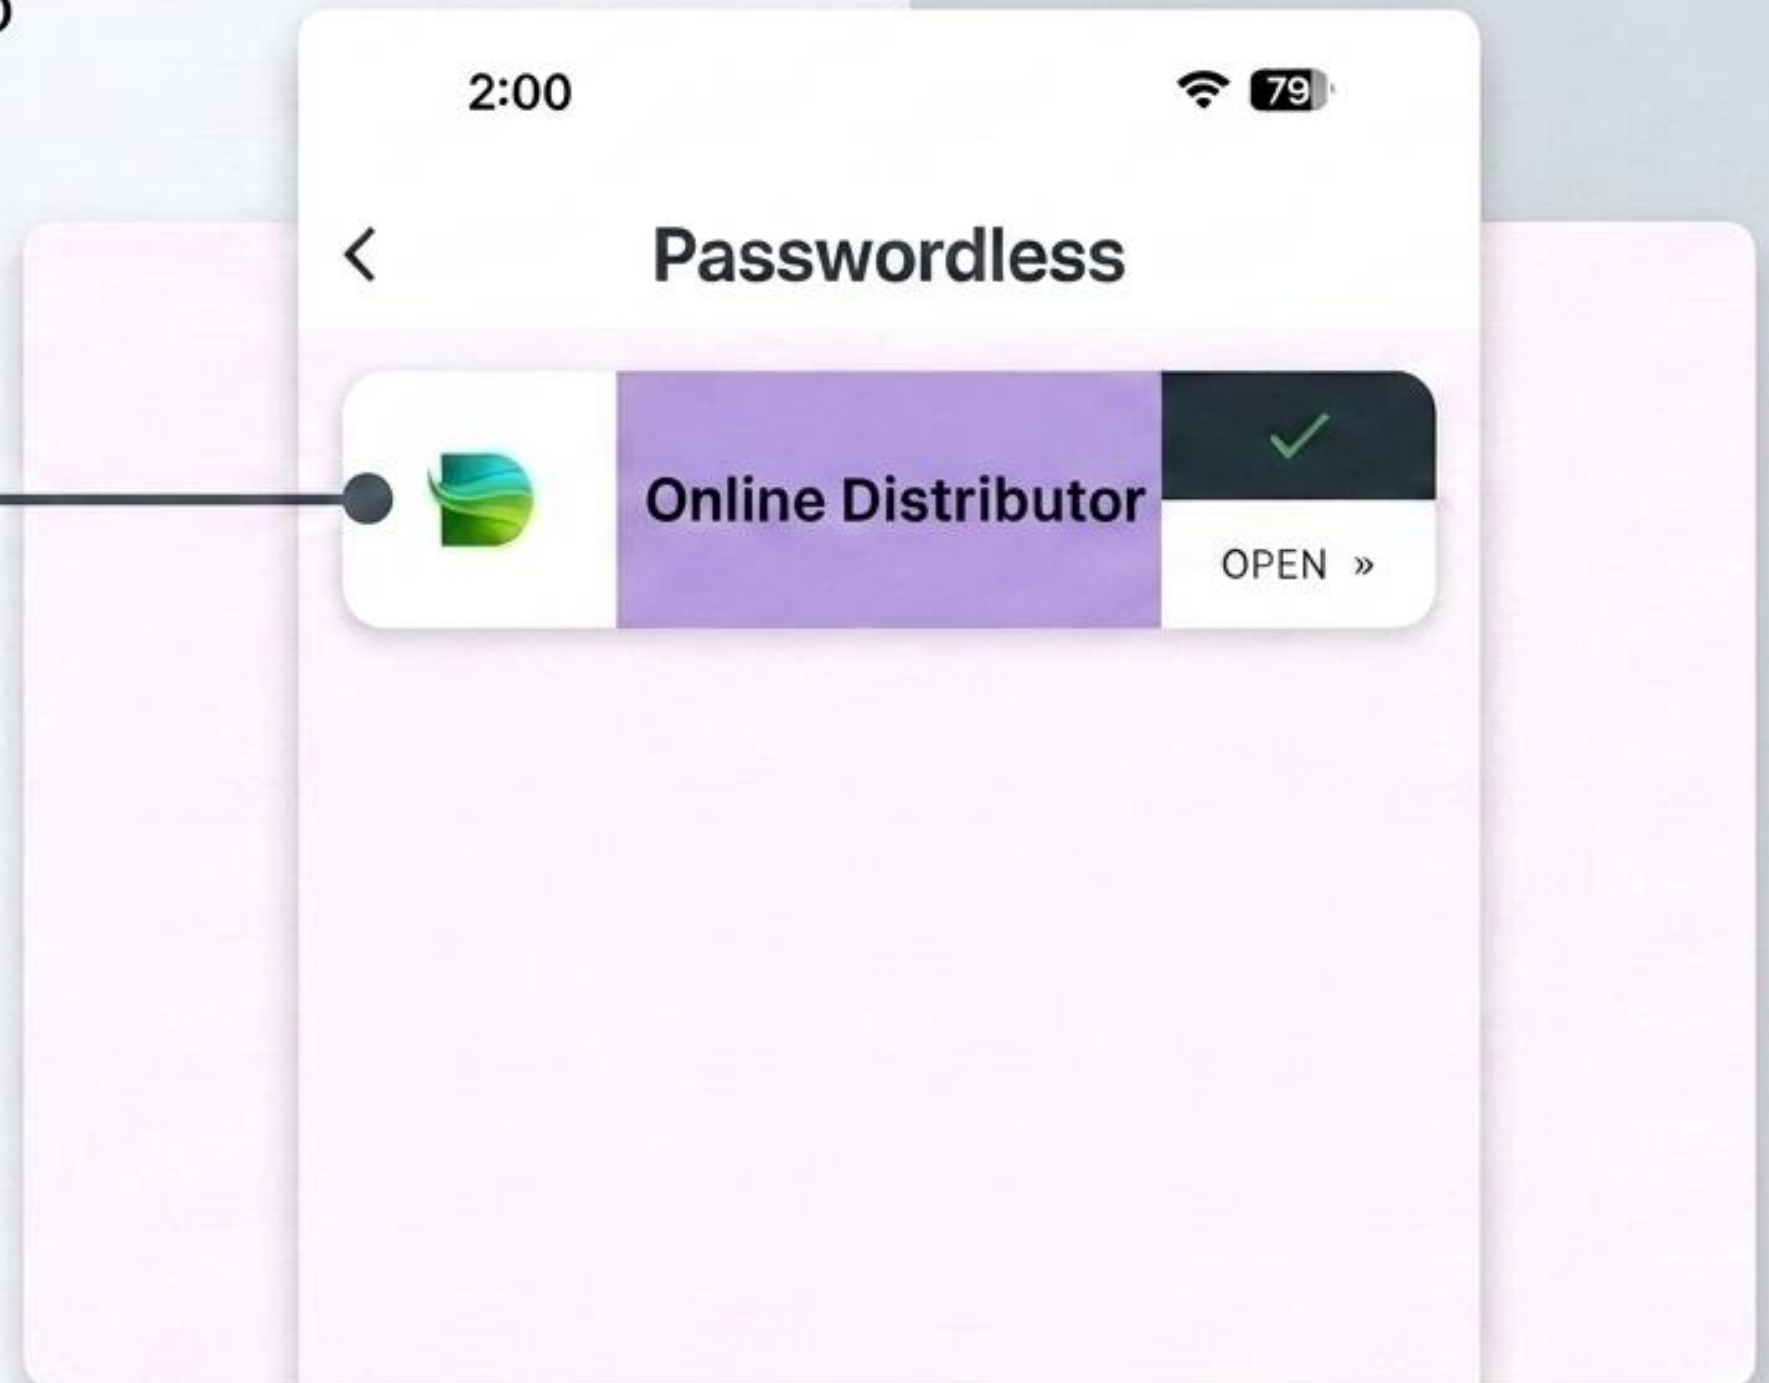

The Upgrade: Why we moved to SecPass.

	Traditional SMS	SecPass
Delivery Speed	 Variable (Minutes/Hours)	 Instant (<5 Seconds)
Network Required	 Cellular Signal	 WiFi or Mobile Data
Security	 Vulnerable to SIM Swap	 Device-Encrypted App
History	 Scattered Text Threads	 Full, Transparent Audit Trail

Your universal access key.

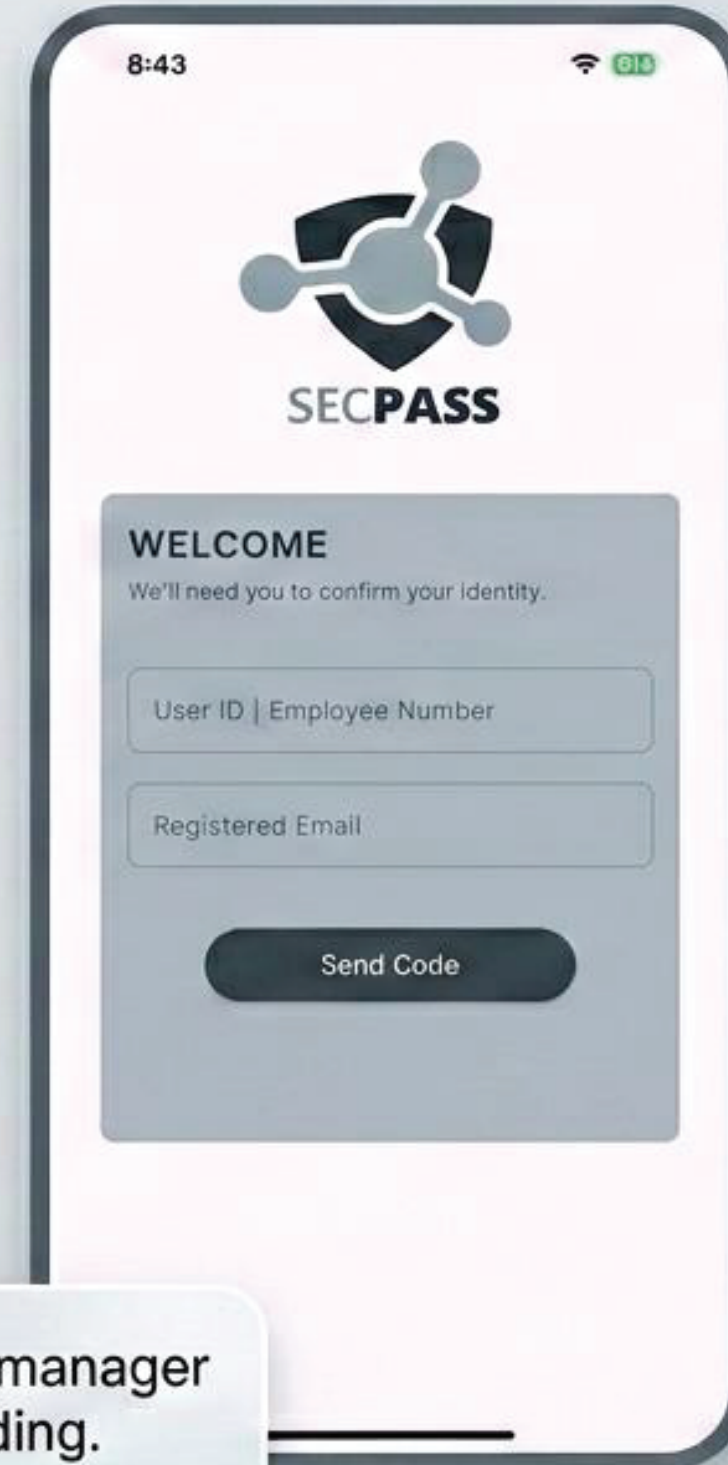

SecPass provides secure, one-tap entry to all corporate environments, including the Distributor Portal.

Phase 1 — Setup & Authentication

Search for 'SecPass' in your app store and install.
Log in using your User ID and
Registered Email.

Download

Missing your login details? Contact your manager to provision your account before proceeding.

Phase 2 — Triggering the Request

Log in to your distributor website exactly as you always do.

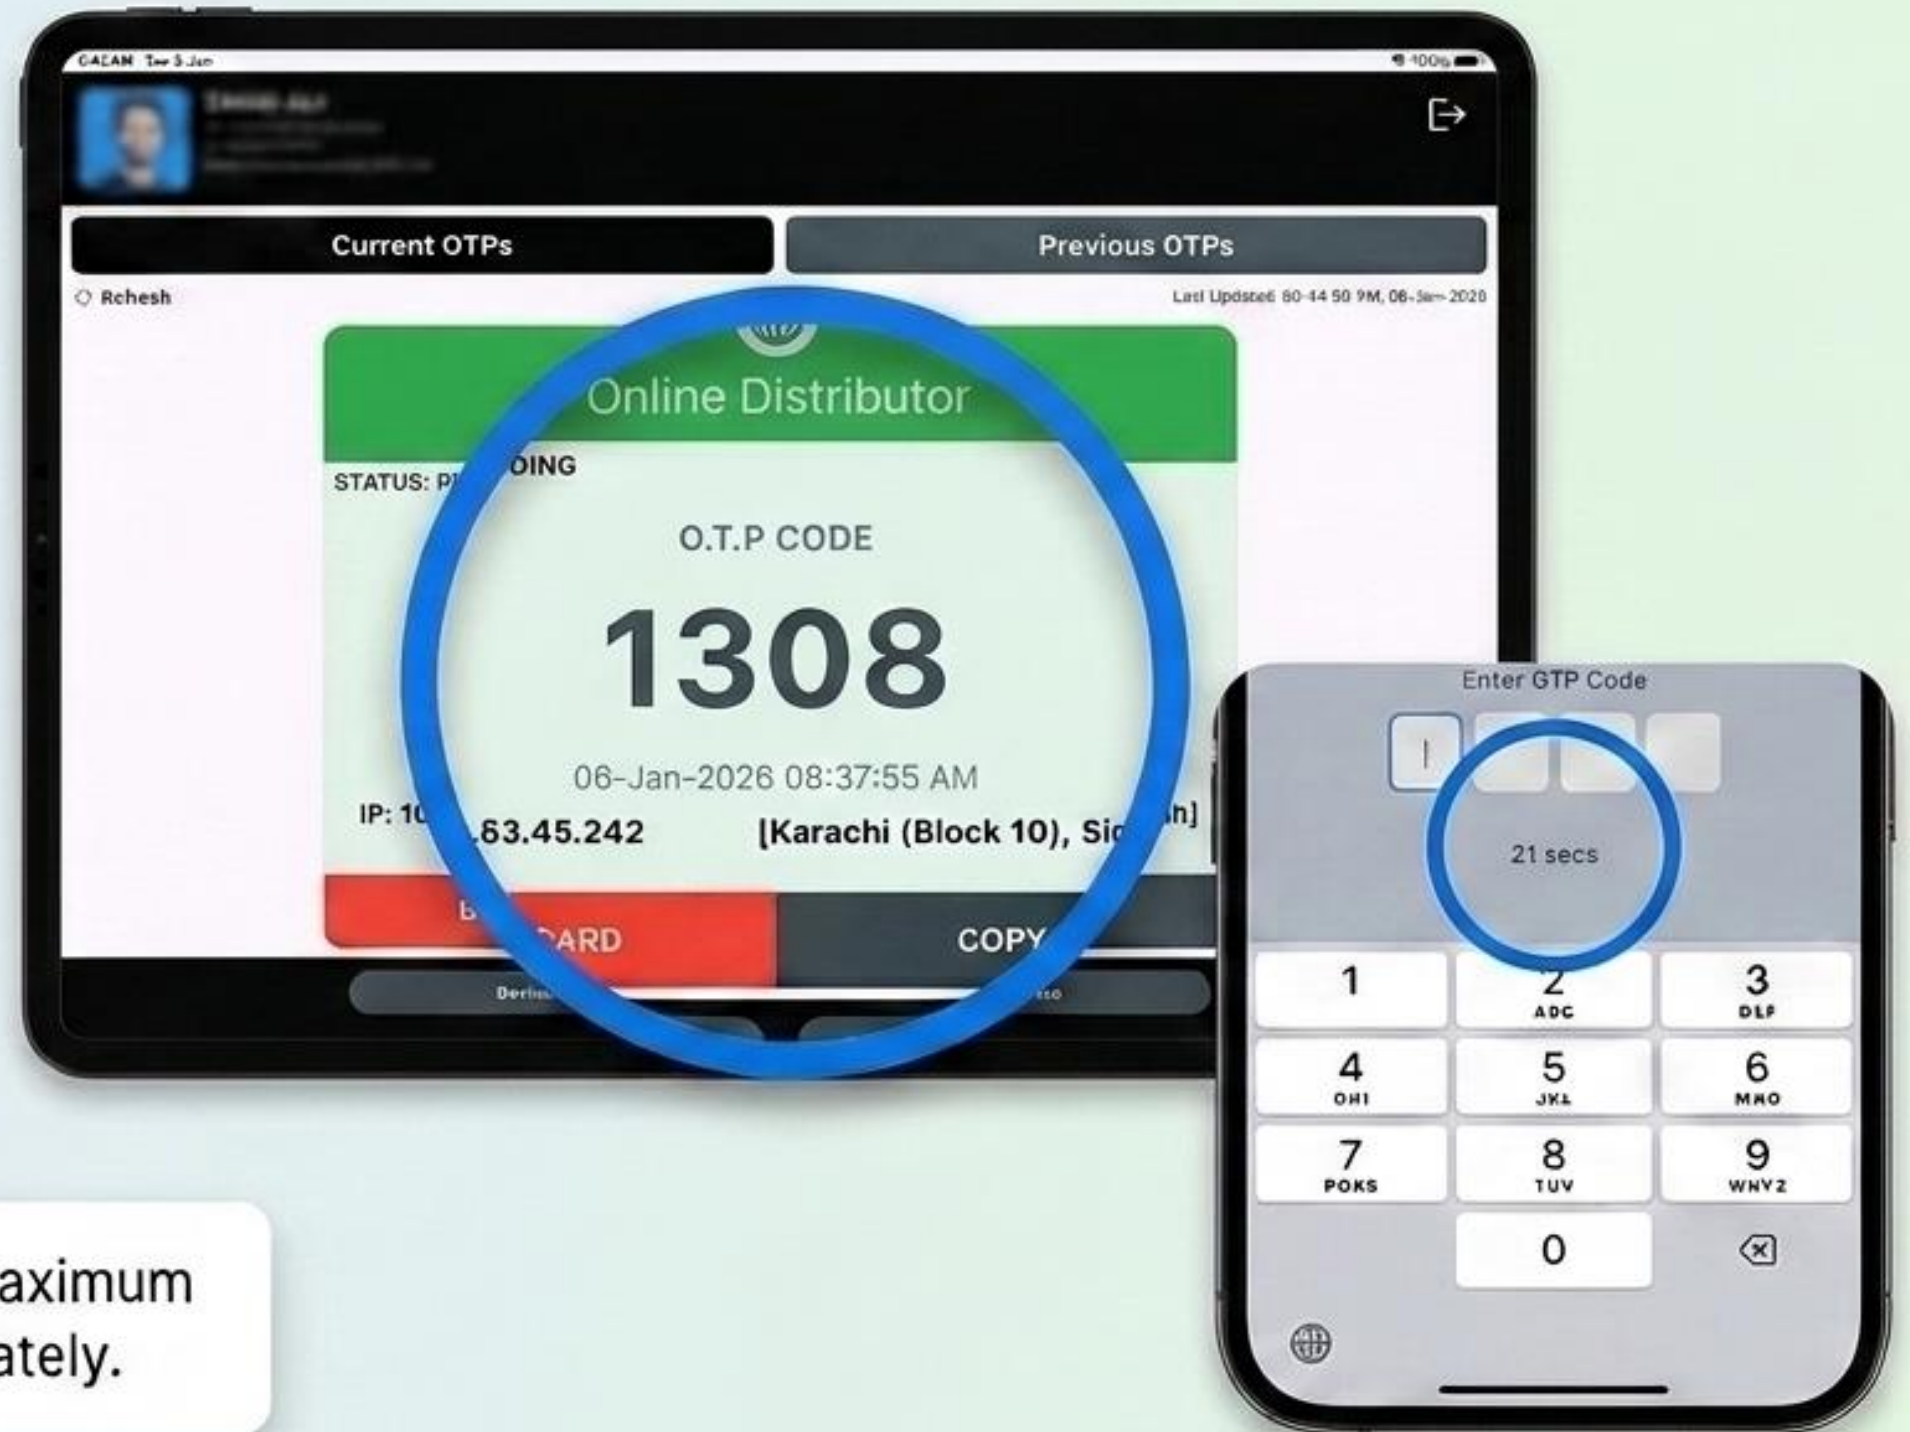

When the site asks for an OTP, **do not wait for a text message.**

Pick up your phone and open the SecPass app.

Phase 3 — The 5-Second Window

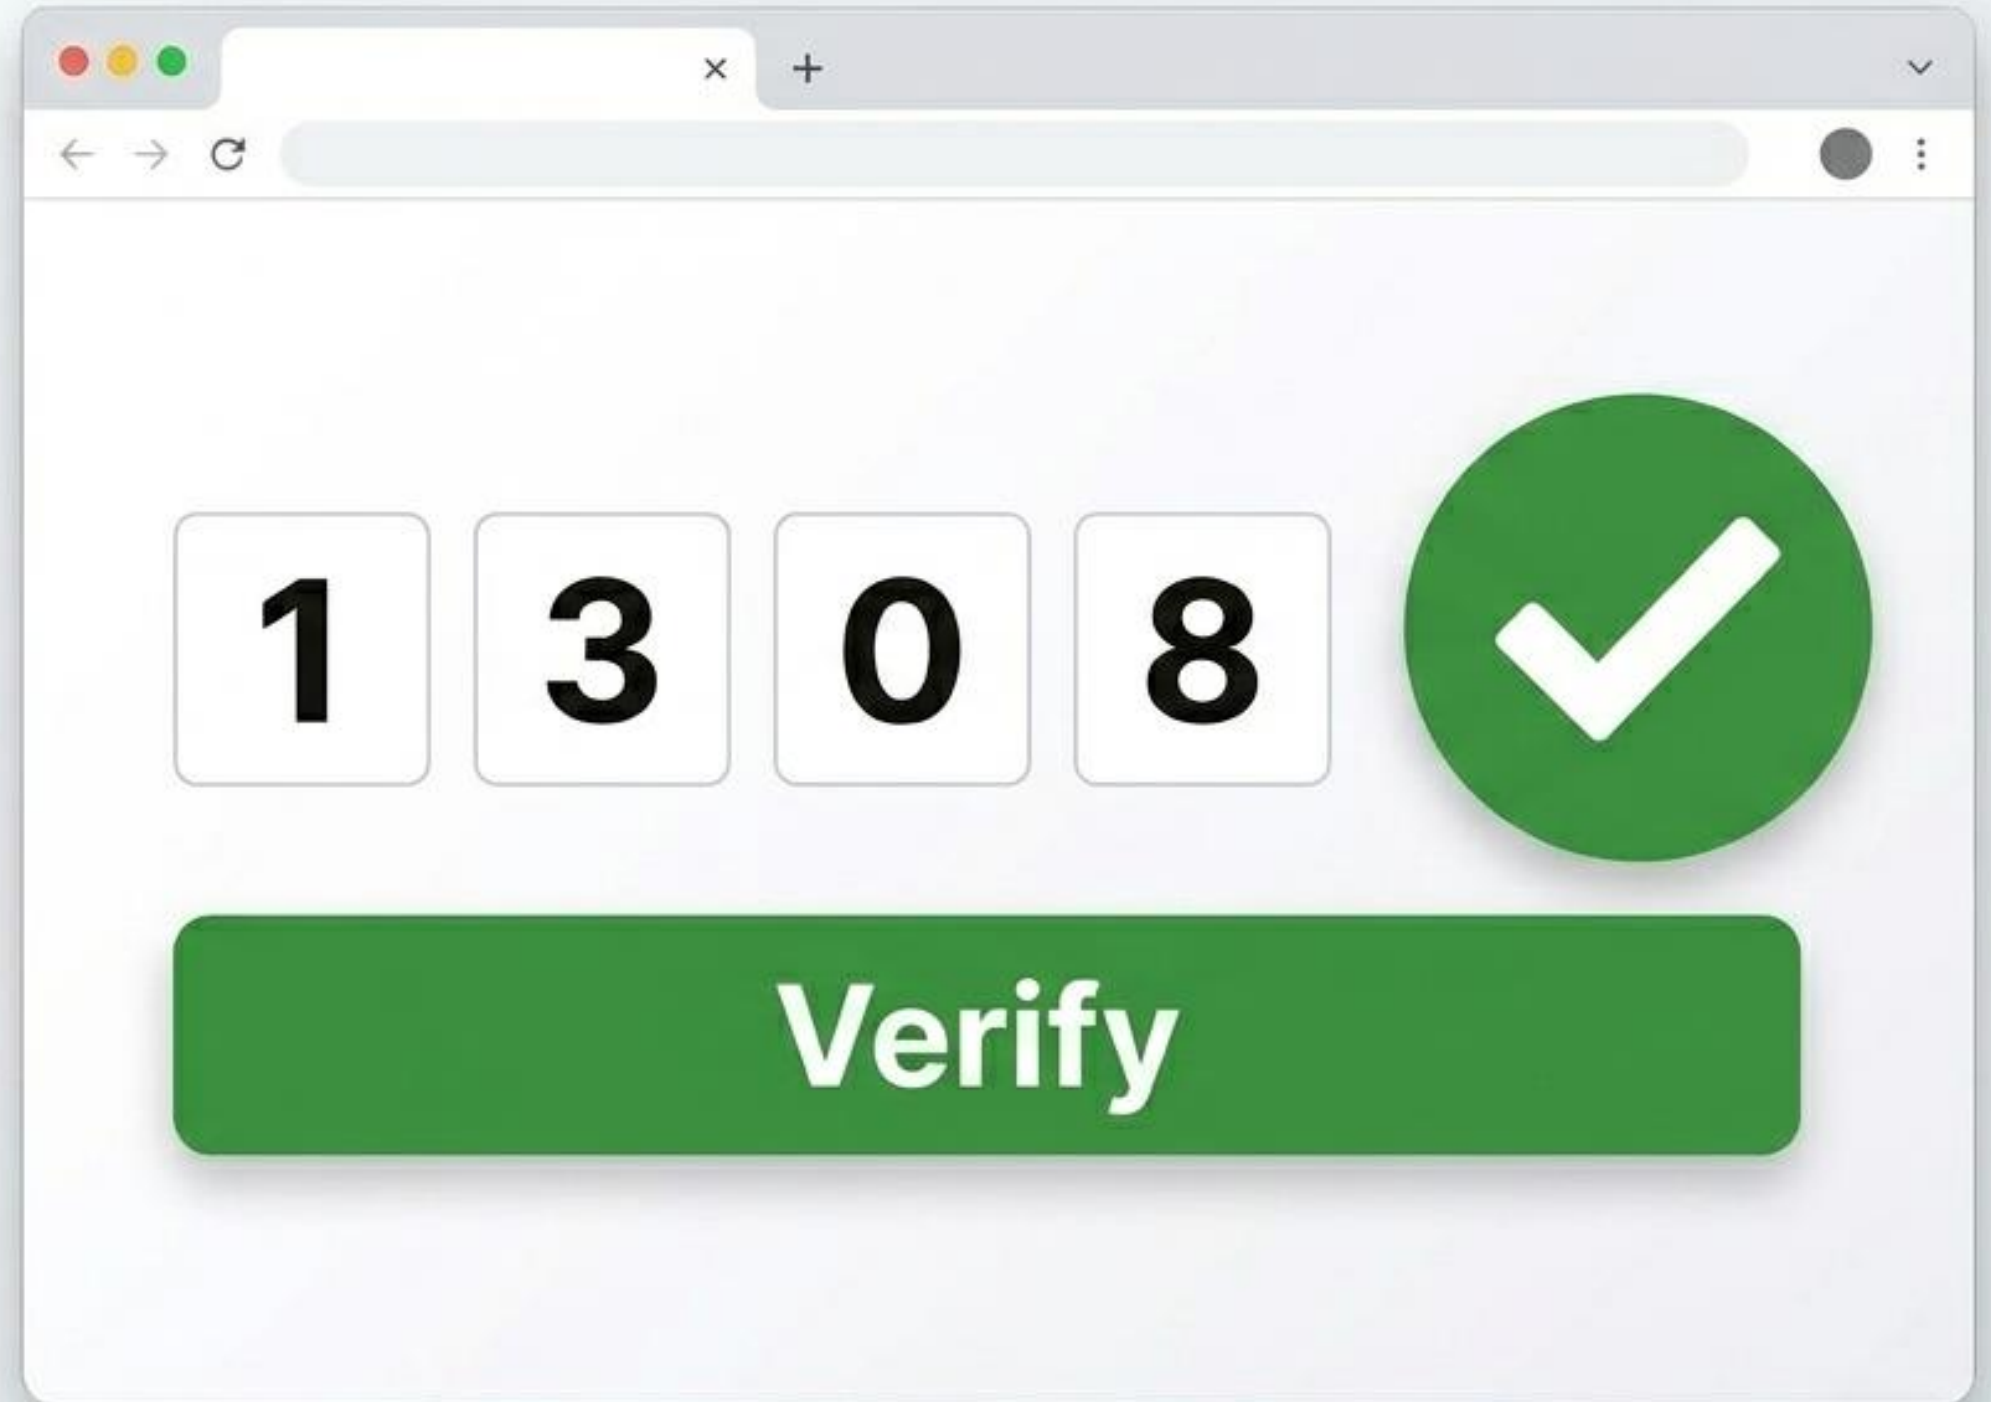

Your code is already waiting.
View your active code inside
SecPass and tap **COPY**.

Pro-Tip: Codes expire quickly for your maximum security. Copy and use the code immediately.

Phase 4 — Seamless Entry

Paste the copied OTP into the website and click **Submit** or **Verify**. You are now securely logged in.

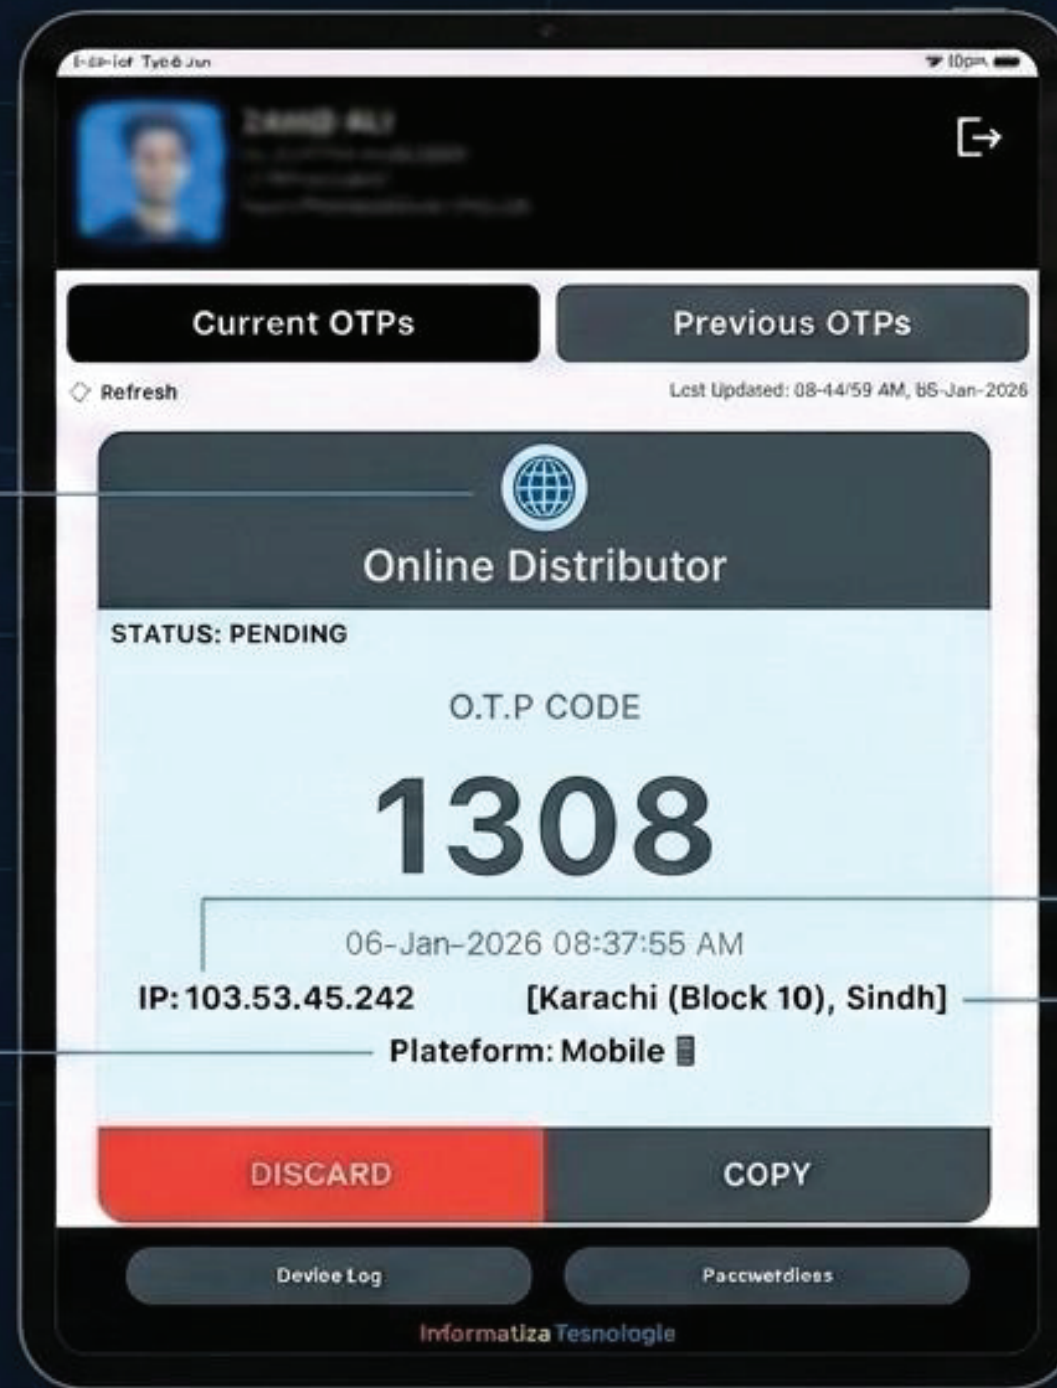

X-Ray of your active dashboard.

Platform:

The specific service you requested access for (e.g., Online Distributor).

Device:

The specific hardware bridging the connection.

Target IP:

The exact network address of the request.

Geolocation:

Traced physical location of the login attempt.

Bound to your hardware.

SecPass doesn't just verify your identity; it binds to your specific, approved mobile hardware. The app logs your exact device model and registration date. No unauthorized phones can generate your codes.

The Golden Rules of SecPass Security.

Act Fast: Do use the copied code immediately before the timer expires.

Keep it Secret: Never share your OTP with anyone.

Lock your App: Never share your base SecPass app login credentials.

One-Time Only: Never attempt to reuse an expired or previously applied code.

Diagnostic: OTP not appearing?

Tap "Refresh" inside the SecPass app.

(Still nothing? ↓)

Verify WiFi or Mobile Data connection is active.

(Still nothing? ↓)

Force close the SecPass app fully and reopen.

(Still nothing? ↓)

Restart your mobile device.

(Still nothing? ↓)

If all steps fail, escalate directly to your IT Support team.

You are ready for access.

Instant, secure, and transparent.

The 5-second gateway to your corporate platforms is live.
